

DELTA VOILES STORM JIBS THE STORM-BAG® EXCLUSIVE FROM DELTA VOILES

THE SPECIAL FURLING STORM JIB

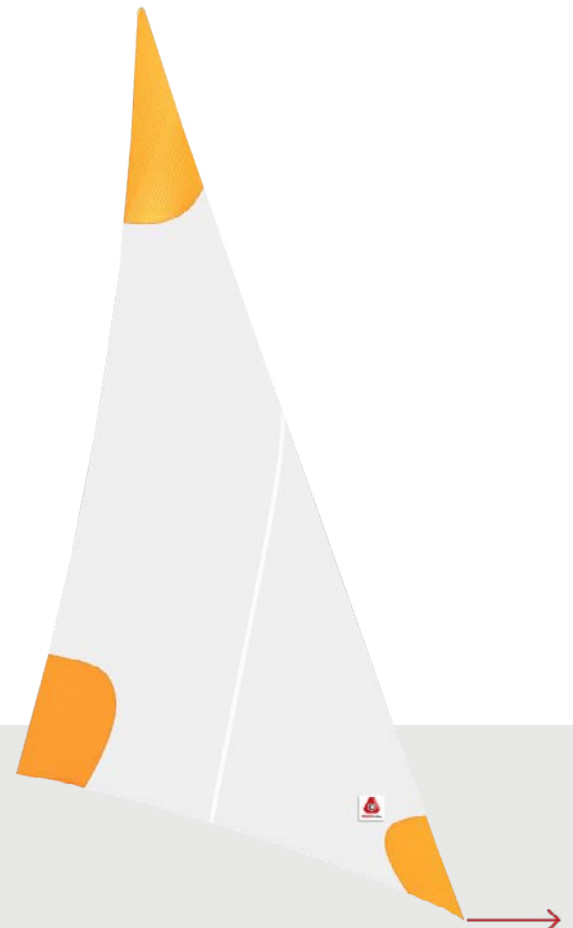

DELTA VOILES OFFERS A SAFE SOLUTION WHICH IS PRACTICAL TO USE.

In big seas and very strong wind conditions, a conventional furling genoa is not suitable: little efficiency or impossible to go upwind, severe heeling and increased risk of lasting damage to the furling genoa and its rigging.

The double-ply storm jib sets over the rolled-up genoa

THE EFFECTIVE ANSWER TO MANAGING YOUR SAILBOAT IN HEAVY WEATHER

CROSS-CUT MODEL

AN IMMEDIATE AND COMPLETE SOLUTION

The STORM-BAG® is pre-equipped with all its fittings: sheets, tack strop and snap-shackles.

- **Set-up is simple and very quick:** just 3 snap-shackles to clip on! Back in the cockpit, **you choose when to deploy the STORM-BAG® yourself**
- Once set, the **special furling storm jib** is an effective sail with a very low center of effort that provides balance without excessive heeling in very strong winds
- A model has been designed to adapt to the specific requirement of Multihulls.
- A compact carrying bag, with a handle, makes it easy to carry the STORM-BAG® to the foredeck. This also means it takes up very little space in the boat when not in use.
