

# LA GRAND-VOILE CROISIÈRE LATTÉE

## À 4 LATTES FORCÉES OU PLUS...

### FOR SAILORS LOOKING FOR GREATER COMFORT WHATEVER THE WEATHER...

A fully battened sail provides stability that generates comfort (the sail no longer flogs) when trimming and in strong winds. Depending on the position of the backstay, DELTA Voiles will be able, after precise measurements, to optimize the shape of the roach to gain ideally placed sail area, very favorable to performance.

#### STANDARD FINISHES

- Reefing points: 2
- Sail-shape visualization strip
- Webbing batten pockets on sliders or M10 or M12 attachments for all batten cars on the market (HARKEN, FACNOR, RONSTAN, etc.)
- Loose footed
- Batten pockets
- Luff: intermediate sliders with elastic
- 4 Full battens
- Anti-UV treated yarn
- Panels glued before assembly
- Leechline: exits leech at each reef point with aluminum clam-cleats
- Telltales on leech
- Clew: stainless steel cringle with webbing or crimped stainless-steel eyelet and boom slider + Velcro® strap around boom
- Tack: stainless steel cringle with webbing or crimped stainless-steel eyelet
- Reefing points on luff: depending on fittings
- Reefing points on leech: crimped stainless-steel eyelets
- Radial reinforcements: 7 in total
- Headboard: aluminum plate or stainless-steel ring with webbing
- Sail bag

#### + CRUISER/RACER OPTION

- **Specific study of the sail area and its design** to satisfy the class requirements
- **Sail numbers**
- **Cunningham**
- **2<sup>nd</sup> visualization strip**

TRIRADIAL CUT "FULLBATTEN"  
MODEL

#### OPTIONS

- Additional reefs
- Flat reefing strips
- Eyelets for reefing ties
- Webbing anti-chafe protection along batten pocket
